EDUCATION

New York University, BSc in Information Systems and Technology
01/2027 – 12/2027 (expected) | New York, United States
- Incoming junior transfer

Vistula University, BSc in Computer Science & Artificial Intelligence
03/2024 – 06/2027 | Warsaw, Poland
- 3.94/4 GPA | 4.93/5.0

University of Messina, BSc in Political & International Relations
10/2021 – 09/2026 | Messina, Italy
- 3.5/4.0 GPA

Sunny Side Educational Institute, High School Diploma
09/2016 – 11/2021 | Addis Ababa, Ethiopia
- 3.96/4.0 GPA
- Top 2% Distinguished Honors Graduate

SKILLS

Technical Documentation: Notion

Presentation Skills & Tools: MS PowerPoint | Canva

Microsoft: Advanced Excel | MS Word | Outlook | Teams | OneNote

Google: Sheets | Drive | Docs

Project-management Skills & Tools: Monday | ClickUp

CRM: Salesforce

Digital Marketing: Content creation | Social media marketing | SEO

LANGUAGES

English: Native (C2)
Amharic: Native (C2)
Italian: Beginner (A2)
Polish: Beginner (A1)

ADVANCED COURSEWORK & LEADERSHIP

Psychology: Discovering Personality, Peterson Academy
10/2023 – 12/2023
Discovering Personality lecture by Dr. Jordan B. Peterson.

AWS Cloud Solution Architect
01/2026 – Ongoing
AWS Certified Solutions Architect certificate track.

EXPERIENCE

Co-Founder & CEO, Marcus
10/2026 – Present | New York, United States
- Agentic AI that **builds a company almost end to end and runs the business by itself**: from one prompt it generates the app and website, branding, marketing content and UGC videos, and can legally register the company in **any of the 50 US states**.
- **Auto mode** then operates the business on its own: email outreach, customer support, marketing and sales.
- Built the AI engine on **OpenAI, Claude and DeepSeek**, with **Runware** for image and video generation and automatic **Pexels** photo and video integration into every site and app it builds.
- Engineered a **multi-tier memory system** (vector embeddings + relational storage) with **persistent long-term memory** that compresses and retrieves context without slowing responses.
- Shipped the full backend (**40+ endpoints**) for auth, real-time streaming chat, voice, image/video generation and web research, with zero-downtime deployment on Vercel; monetized through **Stripe subscriptions** and pay-as-you-go company registration with Palm.

AI for Scientific Computing Researcher, University of Oxford
11/2026 – Present | London, England
- Analyzing **numerical schemes for partial differential equations** with **Prof. Jose A. Carrillo** using **multi agent AI systems**, aiming to build an agentic system.
- Developing a pipeline for the **automatic production of curated code** for these methods, and built **SchemaLabs**, a website for comparing numerical schemes, using my Marcus AI.

Founder & CEO, Chronos
06/2026 – Present | San Francisco Bay Area
- Building an **AI banking & trading app for Gen Z**: a fintech super app with core banking, AI-Financier, BNPL, and a Crypto & NFT marketplace with a life operation system.
- Personally working on AI/ML model training & fine-tuning and **30% of the Flutter mobile app**, while leading business and marketing.
- Leading a **team of 7 engineers and designers**.

Founder in Residence, Genoa Founder School
10/2025 – 05/2026 | Genoa, Italy | Hybrid
- Structured pre-accelerator combining startup coursework with hands-on mentorship.
- Focused on customer discovery, product validation, go-to-market strategy, fundraising, and pitch preparation.
- Mentored by YC alumni founders, FAANG operators, and investors, including **Douglas Leone (Global Managing Partner at Sequoia Capital)**, as well as leaders from Google, Meta, Stripe, Tesla, Apple, Microsoft, and Rippling.

Oeson
04/2025 – 09/2025 | Warsaw, Poland | Internship
Data Scientist (07/2025 – 09/2025) · **Data Science Intern** (04/2025 – 07/2025)
- Analyzed **150,000+ anonymized patient records** using Python and SQL to identify early indicators of migraines and chronic pain.
- Built and deployed ML classification models in Google Colab, **improving symptom prediction accuracy by 22%**.
- Developed data cleaning workflows and normalized time-series records for consistent analysis.
- Collaborated with analysts to define KPIs and enhance intervention timelines.
- Created dashboards and visual reports in Matplotlib and Seaborn to communicate model insights.

AI Engineer Intern, GAOTek Inc.
08/2024 – 10/2024 | New York, United States | Internship
- **Developed and fine-tuned LLM models** using Python, TensorFlow, and Jupyter, supporting chatbot integration for drone platform diagnostics.

Frontend
HTML | CSS | JavaScript

Backend
TypeScript

Cloud
AWS Cloud | Docker

Database
PostgreSQL

Data Analysis & Scientific Computing
NumPy | Pandas | SciPy | Statsmodels | Advanced Excel

Data Visualization
Matplotlib | Seaborn | Plotly | Power BI | Tableau

Machine Learning & AI
Scikit-learn | PyCharm (NLP, Deep Learning) | TensorFlow | Keras

AWARDS & CERTIFICATES

AI Engineer Intern
GAOTek Inc.

C++ Trainee
Virtual CE

Digital Marketing
GAOTek Inc.

Cloud Computing
Coursera

Psychology: Discovering Personality
Peterson Academy

- Built and deployed ML models for **REID fraud detection and BNPL risk scoring** using Akoya transaction data, later deployed to AWS EC2, **improving anomaly detection accuracy by 27%**.
- Collaborated with cross-functional teams to align model outcomes with emerging LT'SS data workflows and real-time RNTS integration efforts for faster alerts and smarter interventions.
- Contributed to full-stack automation web development using GitHub Copilot, **increasing lead engagement by 19%**.

Software Engineer (Android), Ozone Technologies
04/2024 – 08/2024 | Addis Ababa | Remote

- **Contributed 30% of the mobile app development of Telemed** (healthcare consultation appointment booking & medication prescribing platform).
- Integrated RESTful APIs to enable dynamic product updates and real-time user interactions, **improving loading performance by 40%**.
- Led business negotiations with 3 hospitals and 2 pharmacy partners, establishing a **25% profit margin** and contributing to the company's market entry strategy.

Front-End Developer, Kuraz Tech
02/2024 – 03/2024 | Addis Ababa | Internship

- Collaborated on front-end development of an e-learning platform targeting university and secondary school students, **impacting 2,000+ users**.
- Built responsive UIs using Flutter, HTML, CSS, and JavaScript, ensuring cross-device functionality across desktop and mobile.
- Integrated RESTful APIs for dynamic content delivery and course catalog synchronization, **reducing manual update time by 50%**.
- Applied design consistency using version control and Git best practices, aligning with agile sprint timelines.

Founding Engineer, Janderebaw
04/2022 – 03/2024 | Addis Ababa | Hybrid, part-time

- Founding member of a non-profit Orthodox church organization that currently **serves 300,000 people**, with 8 employees.
- **Led the early engineering team** on the website and mobile app development.
- Personally worked on **40% of the website** and cloud database management.
- Engaged in fundraising that helped raise **over $50,000** through crowdfunding.

Network Marketing Expert & Sales Manager, Break Through S.C
08/2023 – 10/2023 | Addis Ababa | On-site

- Spearheaded digital sales initiatives for healthcare and industrial product imports from China and Singapore, achieving a **34% profit margin** in my pioneer function team.
- Co-led business training programs focused on leadership, growth, and performance accountability for **over 100 youth trainees**.

Self Development Trainer, Break Through S.C
06/2023 – 08/2023 | Addis Ababa | On-site

- Delivered personal development workshops on mindset, goal-setting, and public speaking, both online and on-site in Addis Ababa, Malta, Rome, and Messina.
- Designed and facilitated tailored coaching programs that improved participants' self-confidence and communication skills, measured through self-assessment feedback.

Jr. Front-End Developer & Project Manager, Ozone Technologies
2023 – 08/2023 | Addis Ababa | Part-time

- Contributed to front-end development of AGTA PLC's e-commerce website, improving UX/UI and supporting increased online sales.
- Managed digital marketing efforts, including email campaigns and social media, driving lead growth.
- Coordinated IT operations and reporting using tools like Trello and Google Workspace.
- Supported post-launch updates and monitored platform performance to maintain high availability.

EXTRACURRICULAR ACTIVITIES

A2SV — Africa to Silicon Valley (11/2023 – present), member student

CSEC-ASTU — Computer Science and Engineering Club; member of the Hubo Robotics programming contest team

University of Messina — Football player and hackathon member
